## WHY AN ELITE?

*The very best trampoline*

The BERG Elite has been developed with great attention and care. This resulted in a qualitative excellent trampoline, which is safe to use. It does not matter which one you choose, you choose quality with a BERG Elite. The BERG Elite is cleverly designed for long and safe jumping. The combination of the TwinSpring Gold springs and the AirFlow jumping technique ensures less air resistance, a larger jump area and more jumping fun! The protective edge is of extreme good quality.

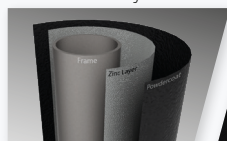

The BERG Elite is available in different sizes and colours. The Elite is available as Regular, InGround, Sports and FlatGround (Sports) trampoline.

In this productsheet you can find information about:

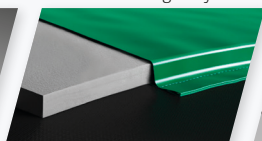

1. The round shape
2. The protective edge
3. The jump mat
4. The springs
5. The frame
6. The Safety Net Deluxe
7. The Safety Net DLX XL

### WARRANTY

Frame: 13 years\*

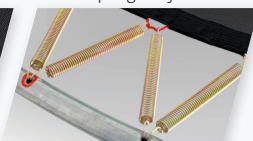

Protective edge: 5 years

Jumping mat: 2 years

Springs: 5 years

## ***1. THE ROUND SHAPE***

The frame of a round trampoline is very strong. On a round trampoline you always jump towards the centre. The best jumps are made in the centre of a round trampoline. This is because the tension on the springs and the frame is equally divided when jumping.

## 2. PVC PROTECTIVE EDGE

Large protective overlap  
over the springs.

Water-repellent  
"closed cell foam".

Available in  
different colors.

Designed with great attention  
to detail, which is evidenced  
in the extremely strong and  
beautifully finished stitching.

Weatherproof top layer  
of enforced PVC.

400 mm

30 mm

The padding has an extra flange on the inner edge that is there to make sure the padding always lays flush with the jumping mat and to prevent gaps in between the jumping mat and the padding.

The Elite padding fits super tight around the trampoline. This helps preventing wrinkles and always looks nice and tidy. The design of the padding has a much tighter fitting than the one on the Champion models.

High quality PVC.  
The Elite padding has an extremely long lifespan which keeps its good looks 2-3 times longer than a Champion padding.

Glossy finish.  
The protective edge looks even more luxurious with the glossy finish. The finish also has a function: the glossy surface contains UV-blocking properties that reflect the light instead of absorbing it. The edge is therefore more resistant to discolouration and wear.

Polyester net.  
The adhesion of the PVC material to the polyester mesh inside is up to 50% better than on the Champion padding. Because of this, the material is much less prone to delamination.

### 3. AIRFLOW

Higher jumps mean more fun. We have developed the AirFlow technique to enable you to make higher jumps. This jumping mat allows 50% more air permeation compared with a standard jumping mat. Good AirFlow ensures less resistance while jumping, which is why you can make higher jumps.

The durable AirFlow jump mat is made from woven polypropylene. The jump mat contains special spring-eyes for the TwinSpring system. The loops for the strong metal spring eyes are thoroughly joined to the jump mat with no less than 8 rows of stitching.

POWERED BY  
**AIRFLOW**  
& TWINSRING

The AirFlow product innovation is only available on the BERG Champion and BERG Elite lines.

50% more air permeation  
for better jumping comfort.

**AIRFLOW**  
Higher & more flexible  
jumping.

**BERGTOYS.COM**

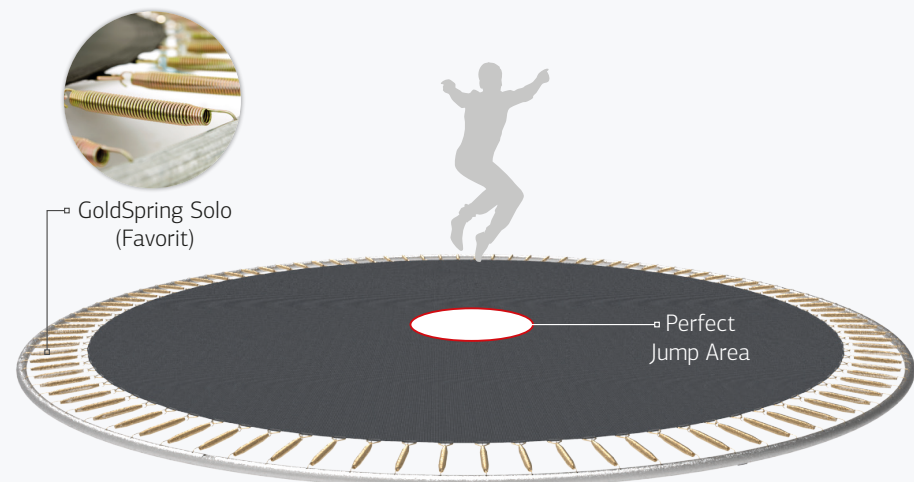

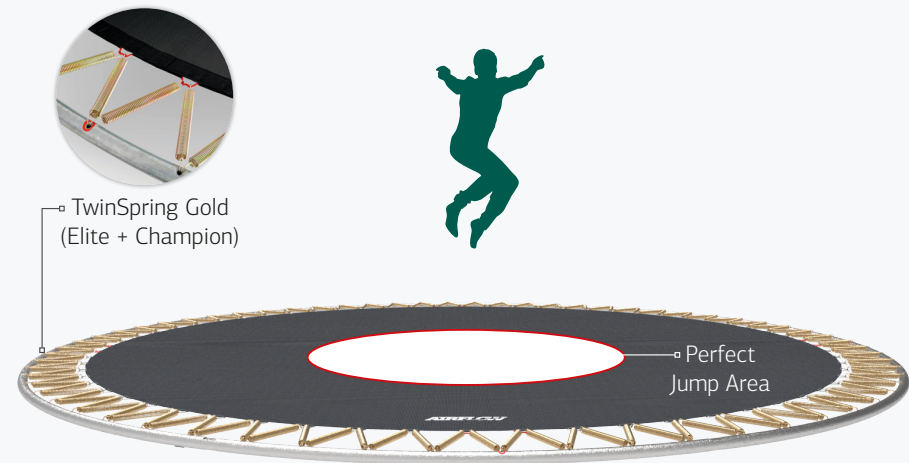

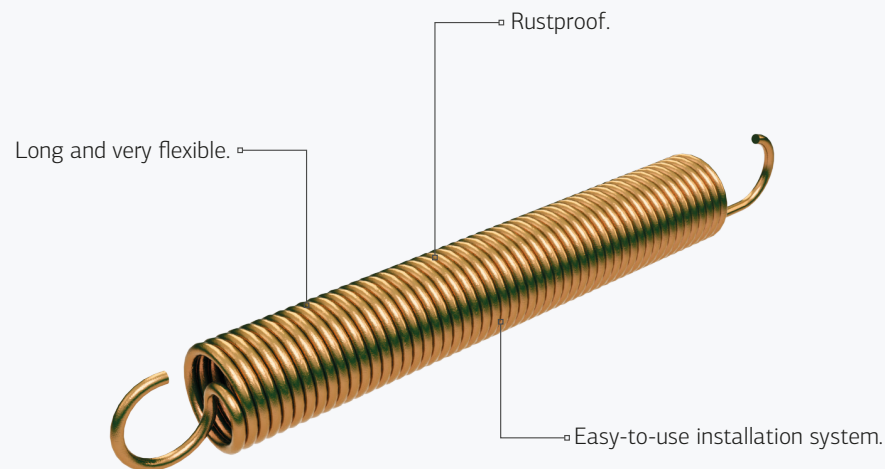

## 4. TWINSRING GOLD

The perfect jump area is that optimal part of the jump mat which results in the best jump experience. Jumping outside of this area results in a sense of feeling as if you are being pushed towards the inner part of the trampoline. Trampolines comprising of TwinSpring Gold Springs are mounted in the shape of a "V". This allows for larger perfect jump area compared to trampolines that are sold with a conventional spring.

Another advantage? Due to the angled positioning of the TwinSpring Gold, the springs are longer in length without compromising the size of the jump mat. This results in a safer trampoline that optimizes playing pleasure!

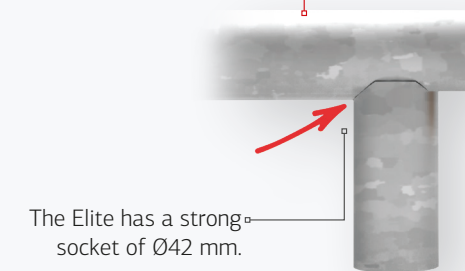

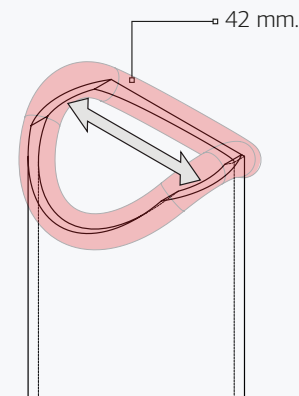

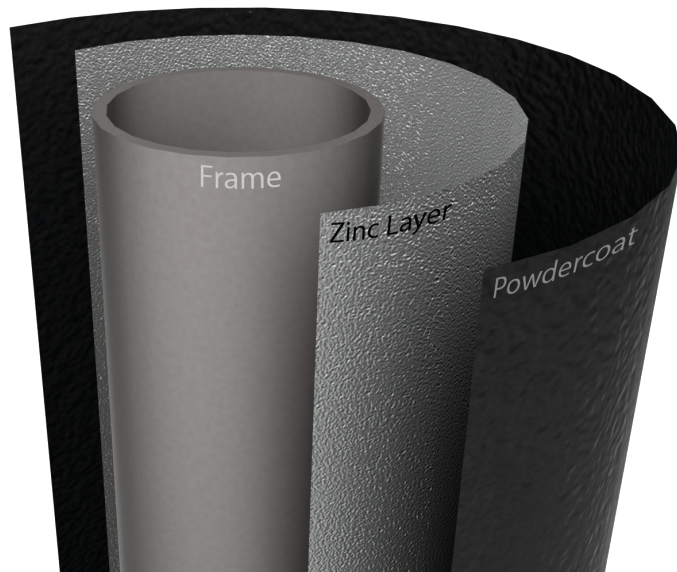

## 5. FRAME

The frame of the Elite trampolines has a very long lifespan. This is due to the large diameter of 42 mm and the wall thickness of 2 mm. In addition, the frame has a solid zinc layer and the frame of the Regular trampolines have a protective black powder coat. The frame is therefore extra rust resistant.

## 6. SAFETY NET DELUXE

The unique hoop at the top of the Safety Net keeps the net nice and taut.

Foam padding around the Safety Net poles provides extra protection.

The poles are equipped with solid clamps that are easy to assemble.

Extremely safe, self-closing entrance with distinctive trim.

The top caps of this trampoline connect the hoop to the poles. The caps have an easy click system and are therefore easy to attach.\*

The curved poles provide extra safety by creating distance between the Safety Net and the pole.

Having the net attached to the outer edge of the padding creates a larger jumping surface.

High-quality, dimensionally stable netting that feels soft to the touch.

\* This new top cap can be used for the old and the new Safety Net Deluxe.

## 7. SAFETY NET DLX XL\*

The Safety Net Deluxe XL is extra high (220 cm). This makes the net extra safe. The high opening makes it easy to access the trampoline.

The pole sleeve has a long split that can be closed with a strip of Velcro.

Extra safe due to the thick layer of foam around the Safety Net poles.

The poles are equipped with sturdy clamps that are easy to assemble.

Thanks to the reinforced upper edge (made of fibreglass poles), the Safety Net is always nice and taut.

The top caps of this trampoline connect the hoop to the poles. The caps have an easy click system and are therefore easy to attach.

The robust, curved poles provide more space between the Safety Net and the pole and therefore provide extra safety.

Having the net attached to the outer edge of the padding creates a larger jumping surface.

High-quality, dimensionally stable netting that feels soft to the touch.

Extremely safe, self-closing entrance with distinctive trim.

## BERG ELITE

*The very best trampoline*

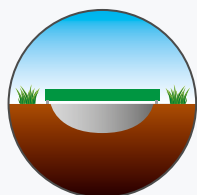

### BERG Regular + Safety Net ● ● ●

If you prefer not to dig a hole in your garden, a high trampoline is a good choice. A high trampoline is easy to install and move around. A high trampoline is also clearly visible in your garden.

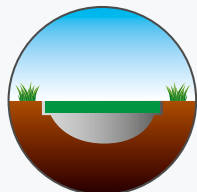

### BERG InGround + Safety Net ● ● ●

A sunken trampoline with a safety net has a low threshold, making it easy and safe to step onto. The InGround trampoline is less visible in the garden than a high trampoline.

### BERG InGround (Sports) ● ● ● **SPORTS**

The sunken trampoline without safety net (sports) is nicely concealed in your garden. The low threshold of 20 centimetres makes the trampoline easy and safe to step onto.

### BERG FlatGround (Sports) ● **SPORTS**

A FlatGround trampoline integrates seamlessly with your garden. This is because the protective edge of the trampoline is completely level with the garden. This makes the trampoline unobtrusive and very easy to step onto.
