## WHY A BERG GO<sup>2</sup>?

*Scoot, pedal, grow!*

The development of your child begins on a BERG GO<sup>2</sup>. The BERG GO<sup>2</sup> is our sleek and ergonomic go-kart for the youngest children! Children from the age of 10 months learn to scoot first with the pedals folded up. Before you know it, your child will be scooting around the whole room. You can then unfold the pedals very easily so that your child can experience go-karting for the very first time!

Besides the fact that the BERG GO<sup>2</sup> is good for the physical and cognitive development of your child, it is a delightful toy for children. The 4 silent whisper tyres ensure that your child can safely and stably ride around in this go-kart. The BERG GO<sup>2</sup> is suitable for indoor and outdoor use.

More reasons to have a BERG GO<sup>2</sup>:

- A fun and natural way to learn to scoot and go-kart
- Ergonomic design
- Direct drive
- Stable and safe due to the 4 wheels
- Grows with your child
- Can be driven forwards and backwards
- Comfortable, soft tyres that cannot go flat
- Available in trendy colours
- Suitable for children from 10-30 months
- Available with handy accessories
- Independent steering
- TÜV approved
- CE approved

## 1. LEARN TO SCOOT

Helping your child to learn to scoot and go-kart is easy with a BERG GO<sup>2</sup>! First of all, your child learns to sit on the GO<sup>2</sup> with the pedals folded up. Pushing off with one little foot on the ground will create a forward motion and, before you know it, your child has learnt how to scoot.

The **BERG GO<sup>2</sup>**  
*the first steps towards the  
development of your child!*

## 2. FOLD OUT THE PEDALS

Scooting has now been mastered; the next step is to fold out the pedals. This can easily be done in one movement. Thanks to the ergonomic design of the GO<sup>2</sup>, your child will not catch his or her little feet on the pedals or rear wheels.

## 3. PEDALLING

Once the pedals are folded out, your child can practise placing his or her little feet on the pedals and learn to go-kart. This will take some getting used to at first and your child can then scoot and pedal alternately. Because the steering wheel and the pedals can be operated independently your child will always have control over the BERG GO<sup>2</sup>. Learning to scoot and go-kart are the first steps towards the development of your child!

Due to the ergonomic design it remains simple to scoot or pedal with unfolded pedals, conveniently bridging the two phases

The **BERG GO<sup>2</sup>**  
the first steps towards the  
development of your child!

## 4. DIRECT DRIVE

The BERG GO<sup>2</sup> is equipped with a fixed connection between the front axle and the rear axle. This means that the movement of the legs is immediately converted to the movement of the rear wheels. This makes the BERG GO<sup>2</sup> super simple and easy to ride, both forwards and backwards.

The **BERG GO<sup>2</sup>**  
the first steps towards the  
development of your child!

## 5. ERGONOMIC DESIGN

The sleek ergonomic design has many advantages. The first advantage is that your child will not catch his or her little feet on the pedals or the rear wheels.

The BERG GO<sup>2</sup> saddle has a unique structure. When your child grows, he or she can sit further back. Thanks to its four wheels, the BERG GO<sup>2</sup> has excellent stability. Because tricycles have one wheel less they are prone to tipping over. Riding sharply or fast around corners on a tricycle creates dangerous situations.

Thanks to the sleek design, the BERG GO<sup>2</sup> is a real eye-catcher in and around the house. The go-kart is also very light, which means the BERG GO<sup>2</sup> is easy to lift up, take with you and stow away.

## 6. STABLE THANKS TO 4 WHEELS

Thanks to its four wheels, the BERG GO<sup>2</sup> has excellent stability. Because tricycles have one wheel less, they are prone to tipping over. Riding sharply or fast around corners on a tricycle creates dangerous situations. This is not an issue with the GO<sup>2</sup>, it's safe and stable!
