BERG BUZZY 2^{IN}1

Beats every tricycle - due to 4 wheel stability

The BERG Buzzy is now also available as a BERG Buzzy 2-in-1. This stable go-kart can now also be used as a push car, so you can take your child with you safely and easily when you go out. The push bar helps you keep control of the go-kart and your child when you are in a hurry. The stability of the Buzzy keeps it safely grounded at all times, even with very active children or when riding over bumpy surfaces. This is in stark contrast to the many 2-in-1 tricycles which are much less stable.

The Buzzy 2-in-1 is, of course, also just a Buzzy. The four wheels ensure stability. The Buzzy is easy to steer because the pedals are not connected to the handlebars, and easy to ride because the handlebars are not pushed away from the child's hands when pedalling.

Is your child tired and wanting to be pushed or perhaps full of energy and wanting to play? In that case the Buzzy can be converted from a push car to a go-kart or from a go-kart to a push car in the wink of an eye.

BUZZY
BEATS EVERY
TRICYCLE
DUE TO 4 WHEEL STABILITY

1. activate freewheel

2. activate steering lock

3. attach push bar

4. set correct height

*More stable, faster
and more **fun and games**
than on any tricycle!*

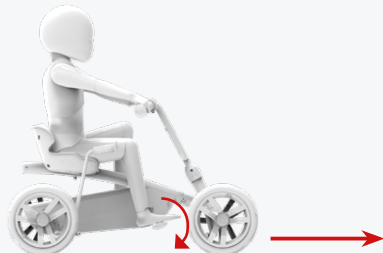

SWITCHABLE FREEWHEEL

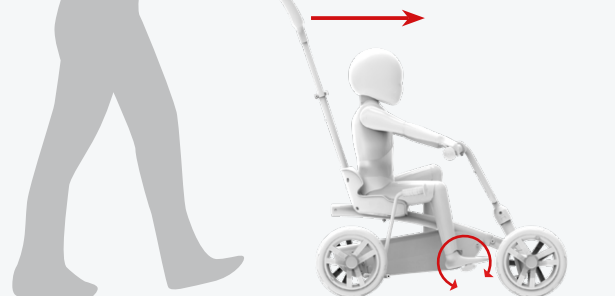

The Buzzy 2-in-1 can be used in 2 modes thanks to the switchable freewheel. The pedal mode enables your child to ride around independently just like on a normal Buzzy. In the push mode the pedals are inactive and the Buzzy can be pushed without the pedals turning. Switching between the two modes is easy by simply turning the ring around the crank axle to the left or the right.

pedal mode:

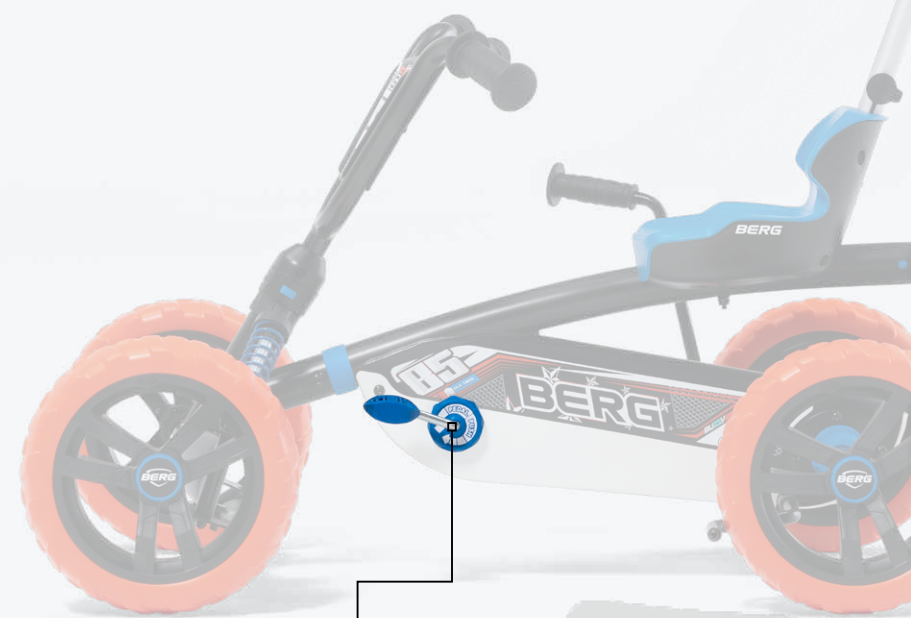

The pedals provide propulsion so that you can move forward independently

push (freewheel) mode:

The pedals can still be moved but they no longer propel the go-kart. The freewheel mode makes it easy to push the Buzzy with the push bar.

Simply turn the ring to the right to switch from pedal mode to freewheel mode to push the Buzzy 2-in-1.

*More stable, faster
and more **fun and games**
than on any tricycle!*

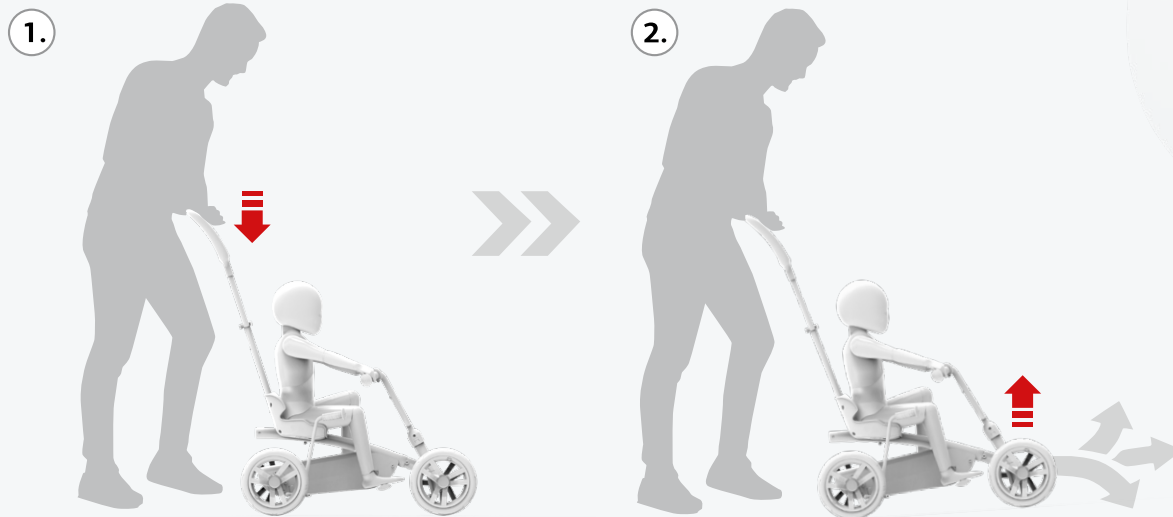

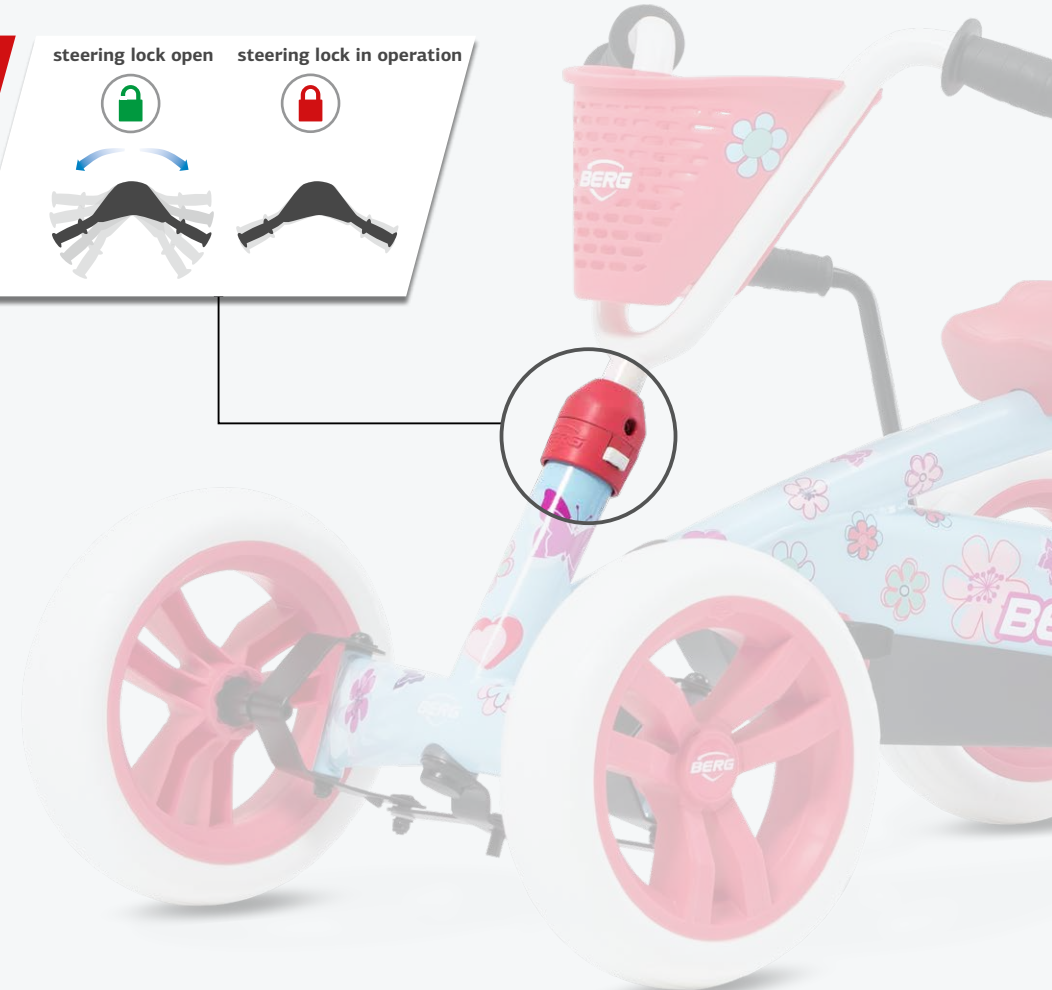

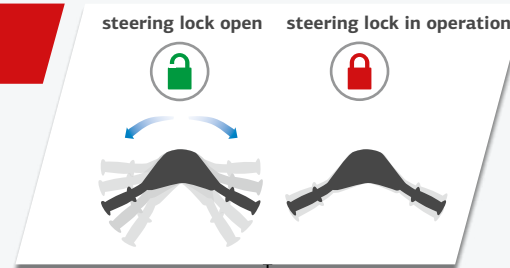

USER-FRIENDLY STEERING LOCK

The Buzzy 2-in-1 is equipped with a user-friendly steering lock to help you walk safely and easily with it. When the steering lock is in operation your child can no longer steer and the parent is in control regardless of the situation. The steering lock is easy to switch on and off by pushing the operating pin on the steering head from one side to the other.

When the steering lock is switched on the Buzzy 2-in-1 can easily be steered by tilting the front wheels up slightly and pushing the Buzzy 2-in-1 in the right direction.

More stable, faster
and more **fun and games**
than on any tricycle!

ADJUSTABLE PUSH BAR

The push bar can easily be adjusted to 3 heights. The Buzzy 2-in-1 can be pushed easily from A to B in combination with the comfortable handle. When your child wants to ride the Buzzy without being pushed, the push bar can be removed in a jiffy. The Buzzy 2-in-1 is then transformed from a safe, stable push car into a supercool and stable go-kart.

The push bar is easy to adjust in height and easy to attach or remove

The push bar is easy to attach

More stable, faster and more **fun and games** than on any tricycle!

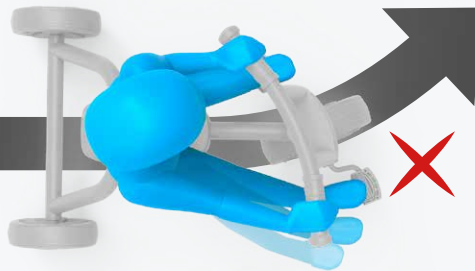

CONTROLLED STEERING AND PEDALLING

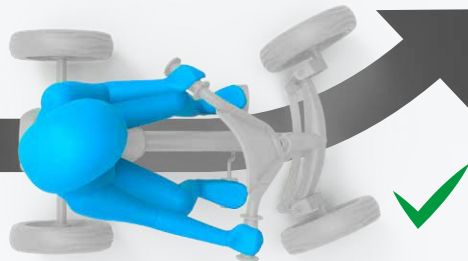

Unlike a tricycle, the pedals and the handlebars of the Buzzy can be operated independently. This ensures that the pedals do not move when steering and the feet remain firmly on the pedals at all times. Riding and steering therefore have no influence on each other, which makes riding on the Buzzy much more fun.

TRICYCLE

BUZZY
BEATS EVERY
TRICYCLE

DUE TO 4 WHEEL STABILITY

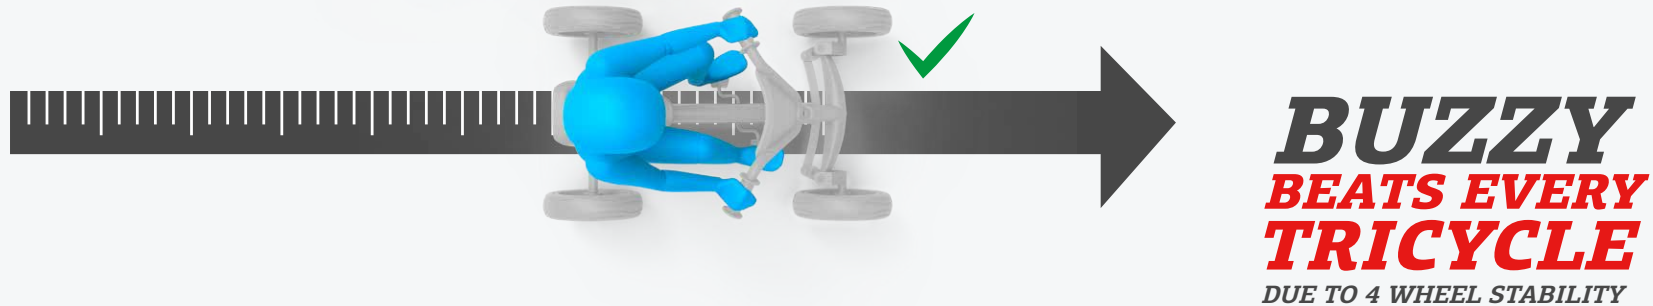

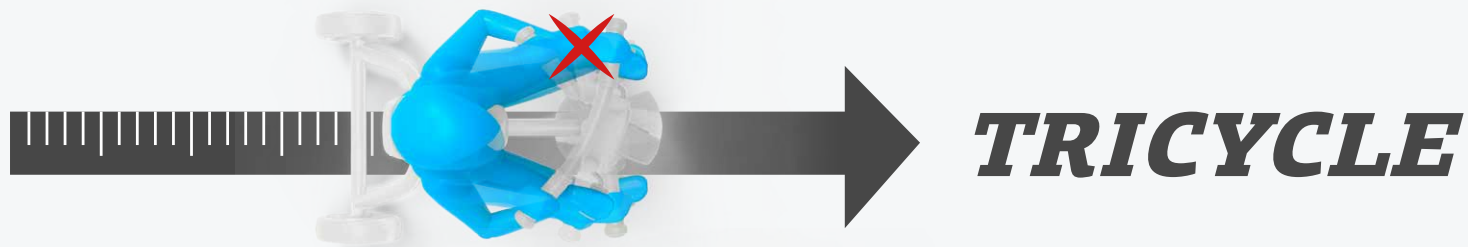

*More stable, faster
and more **fun and games**
than on any tricycle!*

SMOOTH AND FAST ACCELERATION

Because the pedals and the handlebars on a tricycle are connected to each other, a lot of energy is lost in the motion of the handlebars when setting off. The pedals and the handlebars on a Buzzy are not connected and therefore the energy used when pedalling is directly converted into the forward movement of the Buzzy.

Place a tricycle next to a Buzzy and you will see how easy and smooth the Buzzy sets off.

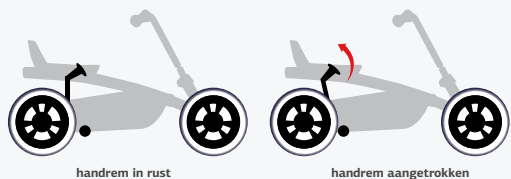

*More stable, faster
and more **fun and games**
than on any tricycle!*

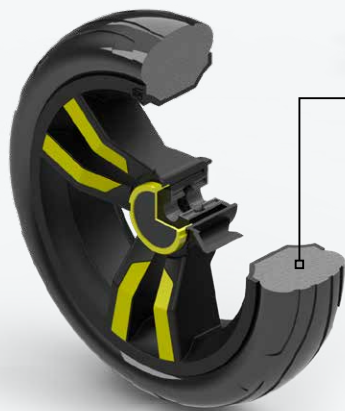

HANDBRAKE & EVA TYRES

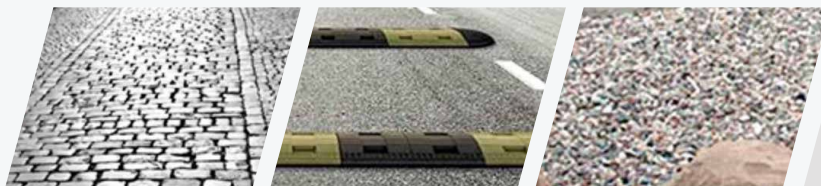

The Buzzy 2-in-1 is equipped with a handbrake for extra safety. Apply the handbrake and the Buzzy comes to a rapid standstill.

An EVA tyre is made from high-tech foam. High-tech foam is the ideal replacement for the traditional rubber inner and outer tyres of the BERG BUZZY. Thanks to the right composition, the tyres are just as wear-resistant as traditional rubber tyres but without the risk of a flat tyre.

The tyres are very silent when riding around, which makes them ideal for indoor and outdoor use on different types of surfaces.

*More stable, faster and more **fun and games** than on any tricycle!*

CHARACTERISTICS

BERG BUZZY RETRO 2^{IN}1

Beats every tricycle - due to 4 wheel stability

The BERG Buzzy 2-in-1 is now available in a trendy retro design. The look harks from yesterday, but the technique is totally now! So you can get about comfortably and safely with your child, and stand out on the street as well! Control of the Buzzy is maintained by using the push bar. The Buzzy's stability keeps it upright at all times, even with fidgety children, bumps or uneven surfaces. Unlike many 2-in-1 tricycles that are less stable due to their 3 wheels.

Product weight: 7.8 kg
Weight plus box: 9.3 kg
Size of box (cm): 46x50x25
